

### Chem and Biochem at the College of Charleston (USA)

Start of a new exchange program

---

**17.05.2019** | Our graduate student Ronja Peter just arrived at The Chemistry and Biochemistry Department of Charleston. Ronja is the first student from the University of Aalen staying there for a couple of month joining a research project. We now have a partnership specifically to make chemistry internships and coursework available to chemistry students. Ronja is visiting through the summer and will be working with Dr. Jay Forsythe.
