

Internship/Praktikum: Become a first-rate Content Designer

Introduction

The IBM Db2 Analytics Accelerator is a software appliance that enables and accelerates analytical and machine learning workloads for relational databases. It supports the most challenging and demanding customers in analyzing and dramatically accelerating their queries in Db2 z/OS. It is developed by several highly agile teams around the world.

IBM Db2 Data Gate provides an integrated approach to synchronize and deliver data originating in Db2 for z/OS to support the increasing demand for analytics and dramatic increase in modern high-volume, high frequency read-only applications.

Your Role and Responsibilities

Help complete the product documentation for Db2 Analytics Accelerator and Db2 Data Gate on time. To this end, you will work with various computer editing and multimedia tools. Prior knowledge of these tools is not required. The product documentation is delivered in the form of written text, graphics and videos to be published on the web, with a strong focus on the target audience.

You will read technical papers and question software developers to extract the required information. You will react to feedback of your work and improve it accordingly.

You are going to work in a truly friendly and responsive environment, in socially attractive surroundings.

The internship can be extended.

A student joining our team will:

- Work in a multi-cultural team, collaborating with engineers in Germany, California and China
- Gain deep knowledge in the development life-cycle of a large project, ranging from system administration over code development and testing to integration into existing products and frameworks
- Benefit from the work with supervisors having a lot of experience in software development and scientific work at universities

Interested ? Available for 6 months ? When applying, please scan all of the following documents into one single pdf file and upload online as your 'Resume/CV':

- 1) Motivation Letter incl. your availability (earliest start & latest end date)
- 2) CV incl. your level of English and German
- 3) University enrollment document ('Imma')
- 4) Current transcript of records and other relevant certificates / references

- 5a) Non-EU citizen studying in Germany: copy of passport, residence and work permit
5b) Non-EU citizen studying elsewhere: prove of identity incl. place of birth

Thank you !
