

Devops Engineer (m/f/d) Automotive Software

📍 Ulm

About us

For future mobility concepts and in-car user experience, software is set to play an even more decisive role. Elektrobit (EB) is a visionary global supplier of embedded and connected software products and services for the automotive industry with more than 3400 employees worldwide. For over 30 years now, we have been developing pioneering technologies for automated driving, new vehicle infrastructures, connected cars, and user experience. We are a wholly owned subsidiary of Continental AG.

At EB we are working toward a world in which mobility causes zero fatalities, produces low emissions, and transforms your commute into quality time. In our collaboration with our customers, including Audi, BMW, Daimler, Ford, GM, Volkswagen Group, Volvo, and many more, we live and breathe our passion for automotive software and for the mobility of tomorrow.

Join our team and help shape the future of the automobile.

Your responsibilities

You develop modern Continuous Deployment Chains using state of the art practices with quick response times and early defect detection

You automate and optimize processes, using tools like Jenkins, Git, Gerrit, Artifactory, etc.

You create reusable and scalable infrastructure using technologies such as Docker, Kubernetes and Ansible

You design and implement tools to monitor and update CI environments for multiple projects automatically

Your profile

You hold a university degree in computer sciences, electronics or similar, have experience with Continuous Integration and Delivery and know the approach of Infrastructure as code well

Tools like Jenkins, Git, Gerrit, Artifactory, Docker, Ansible are well known to you; SonarQube is an advantage

In addition, you have in-depth experience in scripting languages such as Python, Bash and Groovy with good understanding of OOP implementation

You have an interest and initial experience with Kubernetes, Load balancing, virtualization, cloud and other container technologies

Ideally you have advanced knowledge in NFS version 4 and Kerberos as well as experience with automotive technologies and processes (e.g. Automotive SPICE)

You enjoy working in an agile and international team and your written and verbal communication skills in English and ideally in German language are very good

What we offer

Working on exciting and future-oriented projects in international collaboration within a multicultural and diverse team

A healthy work/life balance through access to mobile work and tailored work time models

An informal working environment throughout the company with no dress code

Location-specific benefits such as a canteen, discounts in restaurants, company sports, corporate events, e-bike leasing, preventive medical measures, vacation activities for children, and much more

Company pension scheme, capital-forming benefits

Opportunities for personal development through a range of training courses provided by our academy

Contact us

Apply quickly and easily via our job portal, where you can also import your resume data automatically.
